

An Overview of JTI

Your Global Solutions Provider

The company's formation goes back to 1996, when localization was in its infancy. JTI's initial focus was on assisting IT companies with localizing their software into Asian languages (double-byte characters). Microsoft was the company's first consulting client.

Over the years JTI's client list has grown substantially and the services offered have grown in tandem. By focusing on becoming our clients' partners rather than their vendors, JTI evolved its services from an IT consulting firm, to an end-to-end localization company, including multilingual multimedia, and has now become a true Global Solutions Provider.

As a Global Solutions Provider, JTI is able to analyze and evaluate your global needs and provide the best solution for you to successfully work in the international marketplace.

JTI's services include:

- ❑ Content Translation
- ❑ eLearning Localization
- ❑ Web Media Management
- ❑ Voice-over Recording
- ❑ Multilingual Desktop Publishing
- ❑ Global Resourcing
- ❑ Software Localization
- ❑ Localization Management and many more!

JTI's substantial list of services and resources are managed from its headquarters in Virginia Beach, Virginia and its regional offices in the Netherlands, China, Singapore, India and Egypt. Through process efficiencies, financially responsible management and honest cost structure, JTI is able to offer you the highest quality services at very competitive rates. While maintaining high quality deliverables, JTI prides itself on responsiveness, which is leveraged through our partnership approach.

It is not our goal to have the most clients in the industry, but rather to have strong, long term relationships based on trust and mutually beneficial goals.
